2. Claims 1-39 cancelled.
3. Claims 40-46 have been entered.
4. Claims 40-46 are pending.

Allowable Subject Matter

5. Claims 40-46 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 40, and 41 are independent. The applicant now recites the following two limitations that the encryption key is a graph in a symmetric key cryptosystem and further the ordered set of vertices (of the graph) corresponding to the order of the letters of the first alphabet in the plaintext message, wherein a pathway taken among the order set of vertices defines an ordered set of the edges which distinguish it from the prior art of record. Specifically, Nakamura, which was the closest art of record, has a symmetric key in which the key is a graph. However, in Nakamura two approaches to graphically encryption, the key graph severs to operate on other graphs. With the presents amendments it is clear that there are no other graphs and plus the rules supplied by the second limitation form the method of encryption. Matias which was the next closest prior art to the applicant's invention, again has the key operate on the graph. The same can be said about Bush. Krishnamurthy discloses geometric encryption but is silent on

the second limitation. The Examiner would like to mention a new patent, by Reiter et. al. US 6405313 A.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
